Education

Chameli Devi Group of Institutions Indore, MP
B.Tech in Computer Science, RGPV University Sept 2023 – Sept 2027
CGPA: 7.56/10.0

Technical Skills

Languages: Java, JavaScript, HTML, CSS
Frameworks & Libraries: React.js, Next.js, Node.js, Express.js, LangChain, LangGraph
Databases & Cloud: MongoDB, PostgreSQL, MySQL, AWS Cloud Foundations, Cloudinary
Tools & AI: Git, GitHub, Docker, Postman, REST APIs, LLM Integration, RAG, Generative AI Pipelines
Core Skills: Full-Stack Development, RESTful API Design, DSA, Cloud-Native Deployment

Experience

Full Stack & AI Engineer *Indore, MP*
Samprakshi Infinity Solution July 2026 – Sept 2026

- Architect and scale intelligent full-stack applications, integrating LLMs and AI-driven workflows with Express.js, React.js, Node.js, Next.js, and PostgreSQL.
- Designed and optimized AI-powered RESTful APIs and data workflows, improving query performance through targeted database indexing and refactoring.
- Implemented Sequelize ORM for structured backend data management and AI vector storage, resolving critical database relationship bugs to improve system reliability.

Full Stack Developer Intern *Remote*
LeoMonk April 2026 – July 2026

- Built and maintained scalable full-stack applications using Express.js, React.js, Node.js, Next.js, and PostgreSQL.
- Designed and optimized RESTful APIs for complex data workflows, improving query performance through targeted database indexing and query refactoring.
- Implemented Sequelize ORM for structured backend data management; resolved critical database relationship bugs, improving API consistency and reliability.

Projects

Hostel Gate Pass Management System (SaaS) / *MERN Stack, RBAC, MongoDB, Cron Jobs* GitHub

- Architected a multi-tenant SaaS platform with 6-role RBAC and hierarchical approval workflows for institutional access control, enabling scalable onboarding of multiple institutions.
- Engineered QR-based real-time verification and automated pass lifecycle management using cron jobs for expiry and violation tracking, eliminating manual intervention.

Topiq – AI-Powered Exam Preparation Platform / *Node.js, Express.js, React, MongoDB, Google Gemini AI, Cloudinary, JWT* GitHub

- Engineered a full-stack AI platform that transforms unstructured syllabuses into daily study roadmaps using Google Gemini AI (temperature 0.1 prompt engineering) with Gemini Vision for scanned PDFs and algorithmic PYQ cross-referencing in Node.js.
- Implemented JWT authentication, Cloudinary media storage, file-hash caching, in-memory rate limiting, and a gamification engine with XP progression, streak tracking, leaderboards, and a quiz reward system backed by MongoDB aggregation queries.

LiveEase – Full-Stack Booking Platform / *Express.js, MongoDB, Mapbox, Cloudinary, EJS* GitHub

- Developed a full-stack Airbnb-style booking platform with JWT authentication, listing management, and end-to-end reservation workflows using Express.js and MongoDB.
- Integrated Mapbox API for location-based search and interactive maps; leveraged Cloudinary for optimized image storage and CDN delivery.

Achievements & Certifications

- **Hackathons:** 2nd Runner-Up – HackSprint (1-hour MVP challenge); Top 5 Finalist – Void Hack 6; Winner – Internal Smart India Hackathon Round.
- **GenAI Buildathon** (OpenAI Academy × NxtWave, 2025): Completed Generative AI Mastery Workshop with hands-on exposure to modern GenAI tools and pipelines.
- **DSA:** Solved 100+ problems on LeetCode and GeeksforGeeks (Java).
- **Certifications:** Delta Full Stack – MERN (Apna College) | Programming in Java – NPTEL | AWS Academy Cloud Foundations | MongoDB Developer's Toolkit (GfG).
